

GOVERNMENT SCIENCE COLLEGE, JABALPUR

Best Practices

Second Best Practice

Title of the practice: Societal connect through three A's (Aware, Advise, Assist) during Corona pandemic.

Objectives of the practice:

- To aware people by conducting various activities.
- To advise & motivate people for vaccination.
- To assist people as Corona Warriors.

The Context:

The Corona disease (Covid 19) pandemic, which originated in the city of Wuhan, China, has quickly spread to various countries. India, the second largest population in the world, also faced difficulty in controlling the transmission of severe acute respiratory syndrome corona virus among its population. The ministry of health and family welfare of India had raised awareness about this outbreak and had taken necessary actions and formulated several wartime protocols to achieve this goal.

The Practice:

The Institution and students tried to adapt the best practices during covid 19 pandemic, with available resources and other relevant toolkits. Following measures had been adopted to aware, advise & assist the people as Corona Warriors by NCC and NSS units of the college:

- Awareness about prevention against Corona Virus: Awareness campaign was conducted by the students in college as well as society to adopt preventive measures against the Corona Virus.
- Promoting Vaccination: To promotes Covid 19 vaccination, Department of higher education MP circulated the guidelines, which were strictly followed

by the staff and students. Students of NCC and NSS visited the rural areas to motivate the people for vaccination.

- **Distribution of Hand Made Masks:** Students stitched the masks themselves and distributed amongst the people and conveyed the message that “prevention is better than cure”.
- **Physical Distancing :** Students spread the message to maintain a minimum distance required.
- **Screening Testing :** This was practiced in a regular basis at the entrance gate.
- **Ventilation and Respiratory etiquettes :** This message was conveyed by the students to the public that it could be done by opening multidoors and windows for proper ventilation.
- **Hand washing, Isolation and Quarantine :** Hand washing was demonstrated by the students to make common people aware of the importance of cleanliness and disinfection by making use of sanitizer at regular basis. The terms like Isolation and quarantine were explained to the villagers in their own language that they could understand better.

Evidence of Success:

The people were able to understand the importance of cleanliness, use of Masks, Sanitizer, Social Distancing, Isolation, Quarantine to protect themselves from the deadly corona virus. The people also agreed to go for vaccination and realized the importance of vaccination in prevention and control of covid-19

Problems encountered and resources required:

As the whole world was facing a very difficult time it was very challenging for the students and staff to cope up with the situation. Different batches were made to counsel the students regarding vaccination and safety drives. Students faced many difficulties in counseling the public during NCC and NSS camps as people from rural areas were not easily convinced by them. Still as it is said “where there is will there is way”. Our students proved that and the result was “All’s well that Ends well”.
